

Forget tedious awning cleaning!

GroundCover™ provides optimum protection against soil stains and mud on your awning. Cleaning your awning has never been easier!

GroundCover™ is a thin but strong fibre sheet to lay beneath the groundsheet. When the weather is bad, you won't get soil and muck on the awning canvas and the awning skirt will not be in the mud. GroundCover™ dries rapidly, so it's easy to clean and store.

GroundCover™ is resistant to UV and also breathable. GroundCover™ weighs approx. 2.5 kg and anyone can handle it. You spread it out 30-50 cm bigger than the area of the awning. It covers all common awnings of max. 3.5 m depth.

GroundCover™

Pamper yourself with a cosy, soft underlay

ComfortCarpet™ is a quality underlay for underneath the campsite floor covering to keep the cold and damp at bay and increase comfort.

ComfortCarpet™ is a 5 mm fibre underlay that goes between the plastic barrier/wooden floor and the floor covering in the awning. It warms without absorbing moisture and is comfortable to walk on.

ComfortCarpet™ is breathable and highly durable – it will provide to many years of service. Combining the floor carpet, ComfortCarpet™ and moisture barrier with GroundCover™ gives you the ideal solution that protects the awning canvas and the awning skirt and also provides the highest level of comfort and good indoor climate in the awning.
