Matex 220F

USE: floor, carpet and furniture protection during painting and remodelling

SUITABLE FOR: PVC floors, laminate and wooden floors, carpets, etc.

THE TOP SIDE of the nonwoven is made from recycled textile fibres.
THE BOTTOM SIDE of the product is laminated with antislip film.

MATEX 220F BENEFITS:

- high absorption of paint, water, adhesives and oils prevents unwanted paint smears on surfaces
- partial dust absorption = reduction of dust environment
- safe movement prevents you and any ladder from slipping
- tightness = no dirt and damage of the floor surface
- easy installation and cutting
- quick cleaning after painting
- can be used several times

STANDARD PACKING: 1x10 m, 1x25 m, 1x50 m

This product is also available in different qualities – Matex 180F and Matex 260F.

NOTE: Do not use on newly installed ceramic or stone floors that emit moisture.

Matex Premium

USE: floor, carpet and furniture protection during painting and remodelling
in hospitals and hotels

SUITABLE FOR: PVC floors, laminate and wooden floors, carpets, etc.

THE TOP SIDE is white nonwoven, the white colour of the product does not distort the tone of painted walls.

THE BOTTOM SIDE of the product is laminated with antislip film.

MATEX PREMIUM BENEFITS:

- high absorption of paint, water, adhesives and oils prevents unwanted paint smears on surfaces
- partial dust absorption = reduction of dust environment
- safe movement prevents you and any ladder from slipping
- no dirt and damage of the floor surface
- easy installation and cutting
- can be used several times

STANDARD PACKING: 1x25 m, 1x50 m

NOTE: Do not use on newly installed ceramic or stone floors that emit moisture.
