Pamper yourself and your garden

Fibertex® Quality Gardening

Five strong products

With Fibertex® Quality Gardening you will have the same advantages as the professionals have had for more than 45 years

- Strong material – will not be damaged during installation or by daily use of the garden
- Flexible and easy to use
- Allows water and air to penetrate
- Made of environmentally-friendly materials – no chemicals

Each product is supplied with detailed instructions.

Reduce weeds in garden beds and rockeries

UV Stabilized

- The black fabric prevents the light from penetrating and reduces the weed's growth
- Opacity (resistance to light transmittance) > 95%
- Allows water, fertiliser and air to penetrate, but reduces weeds from below
- Optimum growth conditions for the plants – the fabric holds water and provides constant soil temperature
- Expected service life of more than 25 years when covered – up to 5 years when exposed to sunlight

For reduction of aggressive kinds of weed – couch grass, horsetails and the like – use two layers of WeedSeal®.

WeedSeal®

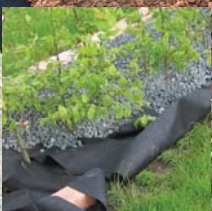

If you do not want to struggle with the tough weeds, WeedSeal® is the best solution for minimal maintenance in your garden.

1×12 m
1×25 m

WeedSeal® is a 100% environmentally-friendly solution.

Recyclable.

Avoid ruts in the driveway

- The fabric distributes the pressure load and gives you a beautiful and even driveway for many years
- Water easily penetrates through the fabric and prevents your pavement from skidding
- Can be used for all applications where **Fibertex Patio®** is suitable

Universal®

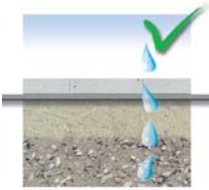

A newly-laid driveway helps your house make a great first impression. **Fibertex Universal®** is the basis for a beautiful long-lasting driveway.

1×12 m
1×25 m

Fibertex Universal® is used under areas subjected to heavy loads such as driveways, parking areas, storage areas, playgrounds etc.

Avoid anthills on the patio

- The fabric prevents the sand from being pushed up and making the pavement uneven
- Water easily penetrates through the fabric and prevents your pavement from skidding
- Can also be used for perimeter drain, fascine and stone drain, sandbox, covering etc.

Patio®

If you do not want ants to invade your patio, place **Fibertex Patio®** underneath your pavement. You will then enjoy a beautiful and even patio for many years.

1×12 m
1×25 m

Fibertex Patio® is used for lightly loaded areas such as patios and walkways.

AquaSafe™

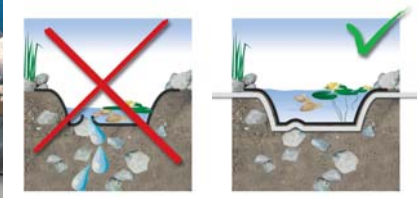

Reinforce the garden pond

- Makes the garden pond leak-tight and long-lasting
- Lasts the lifetime of the pond
- Protects the membrane against puncture caused by sharp stones and other damaging objects underneath the pond

A beautiful garden pond can be the oasis of your garden. AquaSafe™ prolongs the pleasure by ensuring that the membrane will not be punctured.

2×5 m

Sandbox™

Separate sand from soil

- Avoid mingling of sand and soil
- Water permeable
- Easy to use

Keep the sand separated from the soil with the sandbox fabric.

1.7×1.7 m

Tip: Cover the Sandbox™ with the fabric to protect the sandbox when it is not in use.

– and much, much more with Fibertex® Quality Gardening

Ensure a good foundation for the playground

Protect against dirt

Optimise drainage

Use the fabric in raised beds

Fibertex® Quality Gardening products are easy to cut, sew and staple.
